Our Family Business

In 1975, Earle and Dorothy Runnion established Runnion Equipment Company to sell, service and rent truck mounted cranes. Earle had been in the heavy equipment business for 27 years and combined his then named company, National Construction Equipment Company with Talbert Equipment Company, a trailer dealer, to create Runnion Equipment Company in Lyons, Illinois at its current location. The first crane sold by Runnion Equipment Company was a 1963 National Crane boom truck which also happened to be the second crane manufactured by National. This very crane is now on display at the company and is fully functioning.

Today, under the guidance of Patrick Runnion and his management team, the company's primary market is Northern Illinois, Northwest Indiana and Southern Wisconsin. A strong nationwide presence is maintained by routinely buying, selling and renting equipment across North America and from time to time, overseas as well. Don't be surprised to see the Runnion logo proudly displayed on cranes working in Alaska, Hawaii, the British West Indies or anywhere in between!

Runnion Equipment is like most successful family business. At the core is a close knit group of employees who care deeply about everything that Earle Runnion always believed in—treating customers right, giving them more than is expected, finding solutions to problems and not letting anything get in the way of helping out a customer. The same values that have made Runnion Equipment Company a wonderful place to work insure that its customers receive first class treatment. The company has chosen to represent crane brands that perform all day, every day and they always deliver excellent parts and service support.

Why Runnion

Dependable Cranes

Runnion Equipment Company can satisfy all of your telescoping and articulating crane related equipment needs. We carry the finest brands available including: cranes by the National Crane division of Manitowoc, Palfinger, Manitex, Tadano, Prentice Log Loaders and Arm/Lift bucket lifts. For versatility, a full line of crane attachments from Kinshofer and Heiden is also offered. To transport your equipment, tools and supplies to and from the job site, we also offer a wide range of stock and custom trailers from Trail King.

We understand that you need dependable cranes to run your business successfully. We have developed strong, long term relationships with the crane manufacturers we represent. Only those manufacturers who support their warranties consistently and fairly and who also have excellent parts availability have endured the test of time with Runnion Equipment Company.

We always have an extensive inventory of used cranes, all of which have been inspected by our certified technicians. Once we understand your needs, we'll present options that include both new and used equipment.

Knowledgeable Technicians

Because of our commitment to constant training, Runnion Equipment Company maintains an "Elite Dealer" status with our manufacturers. Our Service Department is staffed with factory trained union technicians who diagnose and repair your cranes quickly and correctly—on time and in budget. Our specialized technicians keep abreast of innovations routinely with refresher courses on the latest technological advancements manufactured into today's cranes, such as computer monitoring and plug-in diagnostics. We also offer mobile repair units equipped to make fast, on-site repairs or emergency recovery.

Available Parts

Runnion Equipment Company maintains over a half a million dollar parts inventory to support the telescoping and articulating equipment and trailers that we sell as well as aftermarket and generic, non-critical parts to help you control costs. If we don't have it in stock, we can get it and our reputation depends on our ability to locate it quickly.

We can also help with your parts needs for older, out of production or off-market cranes. Rebuilt and used crane parts are regularly available as are parts for routine maintenance. Runnion Equipment Company stocks a wide selection of hydraulic hoses, fittings and fluids to keep your crane running. Don't let a leaky hose stop you.

Each member of our Parts Department undergoes training sponsored by our manufacturers as part of our "Elite Dealer" status, so that our Parts Team can quickly determine the parts you need. If we don't have your crane parts in stock, our online parts ordering and tracking system uses an emergency "Customer Machine Down" order format for us to get critical items as fast as the factory can ship them to us.

Runnion Rents

Runnion Equipment Company is a crane owner, too, with a fleet of cranes available for rent which allows you the flexibility of supplementing your fleet when you need to finish a job and to give you the opportunity to try out a new piece of equipment. Clean, well maintained cranes can be delivered to your job site for daily, weekly or monthly rental. We also offer a Rent-to-Buy option with a generous portion of your rental payment applied to the purchase price of the unit.

OSHA Inspections

Our OSHA inspections include a detailed list of items that require servicing or replacement in order for your unit to meet applicable OSHA standards. The placement of correct safety warning stickers and operational safety devices is part of these standards. Once the standards are met, the OSHA report and inspection sticker that Runnion Equipment Company supplies insure that your machine is operating safely and allows you access to government funded job sites. In addition, for your peace of mind, we also offer a Pre-Buy or Pre-Auction Inspection of a crane that you are considering purchasing or selling.

Insurance Service

If your crane is damaged in an accident, we can offer you our Insurance Service to minimize your costs and headaches. Dealing directly with your insurance agency, we will recover your crane so as not to cause additional damage, inspect it at our shop and provide you and your agent with a complete estimate of repairs. We have the knowledge and experience to completely rebuild your crane if necessary.

Safety First

Safety is a part of our everyday business at Runnion Equipment Company. All of our technicians are required to undergo extensive safety training. Our Service Department holds weekly safety meetings and tool box talks to discuss procedures and to address situations that arise in our shop. Unsafe practices are simply not tolerated. Our safety practices are reflected in our industry low Workers Compensation modification factor.
