

# Beruprotect Spray

Long-term corrosion protection

## Examples of Application

- Solvent based protective wax for long-term preservation
- Anti-corrosion agent
- Corrosion protection by overseas transport

## Properties

- Excellent adhesion
- Very good corrosion protection even in case of contact with salt water or salt water atmosphere

## Characteristic data

- Appearance: light brown, wax-like layer
- Propellant: propane/butane

Data of the active substance			
Apparent density at 20 °C	g/cm <sup>3</sup>	approx. 70	

## Instructions for use

- Corrosion protection indoor storage: 36 – 48 months
- Corrosion protection outdoor storage: 12 – 24 months
- Film thickness: approx. 20 – 30 µ
- Prior to serial production product compatibility tests are recommended

Please observe the instructions of the current EEC Health & Safety Data Sheet

## Lubrication Solutions for Industry

BECHEM develops, produces and sells high-performance lubricants and process media all over the world. The product range covers the fields of special lubricants, lubricants for industry and lubricants for metal working and forming technology. All product formulations are based on latest tribological knowledge.
