

**SANY**  
AMERICA INC.

**SCC8200**  
Product Guide

## FEATURES

- 220 US T Capacity @ 16 ft 5 in. Radius
- 42 ft 7 in. - 101 ft 8 in. Fixed Jib Length
- 72 ft 2 in. - 167 ft 4 in. Luffing Jib Length
- 289 ft Max Tip Height (H Main Boom)
- 29,542 lbs Main Winch - Rated Line Pull

### OPERATORS CAB

The Operators Cab, designed by Porsche, maximizes glass space for optimal operator visibility and operational safety. The working lights and light bar are standard and well positioned. Equipped with adjustable seats and air conditioner. The cab can be tilted up to a 20° angle and be rotated to the front of platform for transport.

### SANY DESIGNED LMI

SANY designed LMI is prominently displayed. It is user friendly, simple to set up and operate.

The console also features large tv monitors.

### HIGH QUALITY, NAME BRAND COMPONENTS

**Cummins** engine coupled to **Rexroth** hydraulic components deliver high reliability and consistent performance.

## SCC8200

- Engine: Cummins QSL9, 325 hp @ 2100 rpm
- Hydraulic system: Rexroth pumps and drive motors
- SANY-designed LMI with large display screen
- New ergonomic cab, styled by Porsche Design Studios
- Three configurations available: Main Boom, Fixed Jib, and Luffing Jib
- Key standard features
  - Main drum bail limits
  - Main drum and rear counterweight camera system
  - Basic machine lighting package
  - Aircraft warning light

Maximum Capacity @ Radius	220 USt @ 16 ft
---------------------------	-----------------

Main Boom	3,6 & 11.5 Meter Sections 52 ft 6 in. – 282 ft 2 in.
-----------	---

Max Tip Height (H Main Boom)	284 ft 11 in.
------------------------------	---------------

Fixed Jib Length	42 ft 8 in. – 101 ft 8 in.
------------------	----------------------------

Luffing Jib Length	72 ft 2 in. – 167 ft 4 in.
--------------------	----------------------------

Main Winch - Rated Line Pull	29,542 lbs
------------------------------	------------

Wire Rope Diameter	26 mm
--------------------	-------

### Weight

Base Machine (Without Track Frames or Boom)	92,594 lbs
---	------------

Total Counterweight	185,188 lbs
---------------------	-------------

### Length

Base Machine - Transport	36 ft 6 in.
--------------------------	-------------

### Height

Base Machine - Transport	11 ft 2 in.
--------------------------	-------------

### Width

Base Machine - Transport	9 ft 10 in.
--------------------------	-------------

### Tail Swing

	21 ft 1 in.
--	-------------

AMERICA INC.

# SPECIFICATIONS

## UPPERWORKS

### ENGINE

Cummins Model QSL, 9.0 liter diesel, 6 cylinder  
Power ..... 325 hp (242kW)  
Fuel Tank ..... 216 gal (820L)

### HYDRAULIC SYSTEM

Rexroth hydraulic system, including the main pump, main valve, control and motor reducer. It is efficient, energy saving, stable and reliable. It has excellent micro-rotation and performance improvement, load sensing; limit load regulation and hydraulic oil cooling system controlled independently.

### CONTROLS

SANY designed LMI is prominently displayed. It is user friendly, simple to set up and operate. The console also features large tv monitors.

### DRUMS

The main and auxiliary winch are independently driven. Compact and easy-to-install. The low wear and maintenance-free built in wet brake guarantees the security of winch. The variable hydraulic motor automatically adjusts the output load to maximize winch speed based on load.

Rope Diameter ..... 26 mm  
Max Line Speed ..... 410.1 ft/min  
Single Line Pull ..... 29,542 lb  
Max Spooling Main ..... 1,148 ft  
Whip ..... 684 ft

### SWING SYSTEM

Rotary hydraulic driven motor provides 360° rotation. Swing bearing: three-row roller slewing bearing  
Swing speed ..... 0 ~ 2.0 r/min  
Tail Swing ..... 21 ft. 1 in.

### COUNTERWEIGHT

#### **SERIES 1**

1 – Upperworks Tray ..... 30,868 lbs  
8 – Upper Side Block ..... 97,000 lbs  
(12,125 lbs each)  
Total ..... 127,868 lbs

#### **SERIES 2**

1 – Upperworks Tray ..... 30,868 lbs  
8 – Upper Side Block ..... 97,000 lbs  
(12,125 lbs each)  
2 – Upper Side Block ..... 13,228 lbs  
(6,614 lbs each)  
2 – Carbody Block ..... 44,092 lbs  
(22.046 lbs each)  
Total ..... 185,188 lbs

## OPERATORS CAB

The Operators Cab, designed by Porsche, maximizes glass space for optimal operator visibility and operational safety. The working lights and light bar are standard and well positioned. Equipped with adjustable seats and air conditioner. The cab can be tilted up to a 20° angle and be rotated to the front of platform for transport.

## ATTACHMENTS

### HEAVY-LIFT MAIN BOOM (H)

Max boom length.....	282'2" (86m)
Max boom Combination .....	2 – 9'10" (3m) insert
.....	3 – 19'8" (6m) insert
.....	4 – 37'9" (11.5m) insert

### FIXED JIB (FJ)

Max Jib Length.....	101'8" (31 m)
Max Jib Combination.....	1 – 9'10" (3m) insert
.....	3 – 19'8" (6m) insert

### LUFFING JIB (LJ)

Max Luffing Jib Length.....	167'4" (51m)
Max Luffing Jib Combination.....	1 – 9'10" (3m) insert
.....	2 – 19'8" (6m) insert
.....	2 – 37'9" (11.5m) insert

## LOWERWORKS

### CARBODY

Connects upperworks to two independently driven crawler assemblies. Travel motors can achieve lineal travel and counter rotation through motor reducer and high tracktive effort.

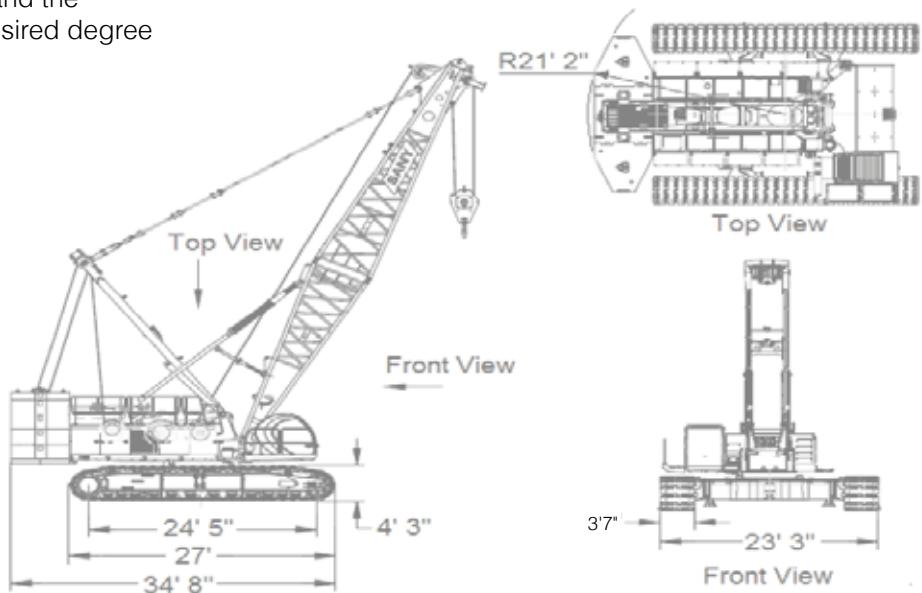

### CRAWLERS

112 track shoes on the left and right crawler unit with a width of 3'7" for each. The tensioning extent of the track shoes can be adjusted via hydraulic jacks, and the position of adjusting pads shall reach the desired degree of tension.

Travel speed

Low Speed ..... 0.8 km/h

High Speed ..... 1.5 km/h

## A-Frame Alarm Device

In installation mode, if A-frame does not rise into correct position, the system will alarm and the operator and work mode functions will be inoperative.

## Aircraft Warning Light

Installed on the top of the boom or jib.

## Anemometer

Installed at the top of boom or fixed jib for real-time monitoring of wind speed and transmission of data to operators cab for display on monitor.

## Anti-Two Block (ATB)

Composed of limit switch and actuation weight on load lines to prevent excessive raising of hook block. When the lifting hook raises to its maximum height, a limit switch will activate the buzzer on the control panel, meanwhile the indicator light will blink and automatically stop the lifting operation of hook block.

## Bail Limits

Composed of a mechanical arm with roller riding on the drum wire rope and proximity switches to inform the operator when 3 dead wraps are remaining. The system will alarm through a buzzer and alarm information will be displayed in the instrument cluster and automatically stop the drum movement.

## Boom Stop

Composed of a spring cushioned boom stop and automatic boom stop to prevent exceeding backwards boom angle limits.

## Boom Elevation Device

When the boom angle is greater than 81°, the buzzer will alarm, and boom control lever will be deactivated. This protection is controlled by a torque limiter and position switch. When the boom angle is less than 30°, an alarm will activate and display information in the control panel and automatically stop operation.

## Drum Locking Device

All drums are equipped with an electric locking device. Before drum operation, operator must switch to unlock before operation.

## Emergency Stop Function

In emergency, press the emergency stop button to cut off power supply of the machine and stop all operations.

## Function Cut-Out

If the function lock handle is not in place, all functions for operating machine will be deactivated.

## Leveling Gauge

Electronic leveling gauge displaying machine angle on monitor.

## Lighting

Equipped with drum lights, lower beam in front of machine, front adjustable high beam, lighting lamps in operator's cab, lighting equipment for night operation

## Lightning Protection Device

Including lightning protection grounding and surge protection devices to prevent damage to electrical components under lightning strikes.

## Monitoring System

**Cameras:** 2 cameras are equipped for monitoring drum spooling, boom hoist, and rear of machine.

**Optional monitoring:** variable zoom monitoring camera system on boom top monitoring the working conditions of hook block.

**Optional remote control:** GPS satellite positioning and GPRS data transfer, device status information, statistics, monitoring and analysis of operational data and remote fault diagnosis.

## Rearview Mirror

Installed on the right of the operator's cab for monitoring the rear of the machine

## Swing Lock

Hydraulic power pin lock to lock the crane in front, rear, left and right positions.

## Shove-Off Seat Protection

The operator must be seated for all machine functions to work

## Signs For Boom Angle

Pendulum angle indicator device is located in boom base next to the cab for operator convenience.

## Sound And Light Alarming Device

When engine is running, lights will flash; when traveling or swinging, alarm will sound.

## Switch Of Installation Mode / Work Mode

In installation mode, bail limits, boom elevation device, and torque limiter are inoperative to facilitate crane installation. In operation mode, all the safety limits return to normal.

## Three-Color Load Warning Light

There is green, yellow and red load warning lights, simultaneous displaying real-time load. When the actual load is less than 92% of rated load, the **green** light is on; when the actual load is between 92% and 100% of the rated load, the **yellow** light is on, the pre-warning lights will flash and intermittent alarm will be issued; When the actual load reaches 100% of rated load, the **red** light is on, the pre-warning lights will flash and intermittent alarm will be issued; When the actual load reaches 102% of rated load, the machine will automatically stop hoisting functions.

## Torque Limiter

A completely separate and secure computer-controlled operating system; torque limiter can automatically detect the load of cranes and the angle of boom and show its rated load and actual load, working radius and boom angle.

**Components:** machine, monitor, angle sensors, force sensors etc.

**Functions:** can display real-time rated load, actual load, working radius and boom angle, height and other data at current status of the crane and give real-time alarm if limits are exceeded.

## Turn Indicating Device

When traveling or swinging, turn indicating light blinks.

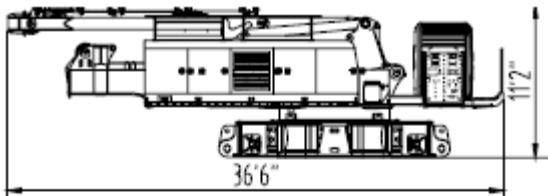

## Wire Rope Guides

Lifting hooks are provided with guides to ensure the wire rope is maintained in the correct sheave location.

Height	5'11"
Weight	1653 lbs

## 14.9 USt (13.5MT) HOOK BALL

Length	1'7"
Width	1'7"
Height	3'1"
Weight	1146 lbs

### NOTES:

1. The transport size of this part is diagram, which is not drawn based on scale, the indicating size is the design value, and the packaging is not included
2. The weight is the design value, due to the manufacturing errors, the weight error is about  $\pm 2\%$
